

Medical Expense Checklist

Medical expenses are the costs of diagnosis, cure, mitigation, treatment, or prevention of disease, and the costs for treatments affecting any part of the body. They include the costs of equipment, supplies, and diagnostic devices needed for these purposes. They also include dental expenses.

Medical expenses must be primarily to alleviate or prevent a physical or mental defect or illness. They do not include expenses that are merely beneficial to general health, such as vitamins or a vacation.

Medical expenses include the premiums you pay for insurance that covers the expenses of medical care, and the amounts that you pay for transportation to get medical care. (IRS Publication 502)
